WELCOME HOME ENGINEERS

Vol. XXVIII.

THURSDAY, OCT. 29, 1936

No. 3

A MESSAGE FROM THE PRESIDENT

It gives me much pleasure to welcome back to their Alma Mater, the graduates in the Faculty of Applied Science and Engineering. No Faculty in the University has a more distinct individuality than that of Engineering, and no group of graduates are more loyal to the University as a whole. Whenever I visit a gathering of the Alumni Association, the shout of "Toike Oike" rings out with whole-hearted enthusiasm.

In the discovery, conservation and development of our natural resources, the Engineer plays a decisive part. He creates means of communication. He erects power plants. He applies to industry the latest discoveries of science. He is in every way a true nation-builder. The moral qualities of accuracy, thoroughness, and determination, which mark his professional work are equally necessary to the character of a good citizen.

The "Old School" preserves its continuity of tradition and yet progresses with the growing needs of the times. I wish you all a happy reunion and renewal of old friendships and loyalties.

H. J. Cory,
President of the
University of Toronto.

MESSAGE FROM PRESIDENT ALUMNI FEDERATION

It gives me great pleasure at this time to extend greetings to the graduates of the Faculty of Applied Science and Engineering returning to the Campus on the occasion of the Triennial Reunion of the Engineering Alumni Association and the University of Toronto Alumni Homecoming.

May I, on behalf of the Alumni Federation, express to you our appreciation of the continued generous support given to the Federation activities by the Engineering Alumni. We particularly appreciate the whole-hearted co-operation which has been extended to the Board of Directors of the Alumni Federation in preparing for Homecoming.

We trust that you will enjoy fully the splendid programme prepared by your own executive, that you will participate freely in events planned for the Alumni of all Faculties, and that you will take away with you a renewed enthusiasm for your Alma Mater.

W. J. DEADMAN,
President, Alumni Federation,
University of Toronto.

W. J. DEADMAN

WELCOME HOME TO GRADUATES

Again, a hearty welcome to the Graduates "coming home to Old School".

These triennial reunions come around each time with a new freshness which appeals to all graduates, be they three or thirty years out. The graduates of 1936 take their places with those of former decades, in a proud sense of belonging to a great University club which now spreads across the continent and throughout the world. This year there will be returning, graduates from England, from South America, and China.

The Faculty continues to make notable progress. The number of students to-day indicates that even with the effect of the depression, the urge to take applied science courses in preparation for participation in Canada's development, continues the same as in past decades. As we look back ten years, for instance, and remember the low attendance of about five hundred, due to post-war conditions, it is significant to observe that never during the intervening severe depression has the attendance been lower than seven hundred, while the high has been slightly over nine hundred in 1932. While

EDITORIAL

Welcome!

To all you wearers of the iron ring, we, the undergraduates, welcome you back to the ancient and time-honoured portals of S.P.S. Yes, the old "School" is still here; the same buildings, the same spirit and even the same April rush.

You are to be congratulated on the snappy programme your executive has drawn up. Remember it is the whole-hearted co-operation of all the graduates that makes the Alumni of School what it is—the most powerful graduate body of the University.. Keep up the good work, and we'll see you at the Smoker.

MESSAGE FROM PRESIDENT ENG. ALUMNI ASS'N.

The smoke signals have been advanced to all sections of the globe, calling the great tri-annual tribal meeting of 'School' Alumni for the heap-big pow-wow of 1936. The foregathering will take place in the old historic stamping grounds, at Varsity and Big Rock Royal York.

The last pow-wow of three years ago was held in what is now recognized as the ultimate depth of the depression, and the present is being called in the midst of returning prosperous times. During the depression our Mining tribe has nobly held the fort, while the others scouted on short rations. The Chemical, Mechanical, Electrical and Civil tribes have reached happier hunting grounds; their young braves are being placed to advantage; and the scouts of the Architects are reporting better conditions to be in sight.

In celebration, heap-big kettles, stew and brew, have been requisitioned to sustain and cheer, and the big pom-pom is well-planned by competent chiefs.

The opportunity is provided for renewed friendships with classmates and associated years and for fraternizing with fellow graduates of years from 1881 to 1936. Reminiscences and experiences will be bandied and exchanged in tall dimensions and a good time is assured.

For your Council, I extend a most hearty welcome and best wishes for a happy Reunion; please consider our services and facilities at your command for anything that will promote your enjoyment of the occasion.

W. D. BLACK

CHAIRMAN'S MESSAGE

A group of Schoolmen have been working since early last Spring to make this, the Ninth Reunion, the best we have ever had—and from the reports of the Committees handling the functions, it looks as though their efforts will be highly successful.

Every Committee has a bang-up programme for your enjoyment—from the Smoker on Thursday, to the Dinner on Saturday night. Ted Emerson and his Smoker crew, Harold Crane and the Dance Directors and Art Frampton's Dinner gang, have the three major events well in hand and from advance registrations, these parties will be over the top with a bang.

Among all the festivities—the luncheons, football game, class parties, etc.—remember that there is a serious side to this Reunion. Once every three years, the Council of the Association meets the general membership and from the discussions at this meeting the policies for the next three years will be decided.

H. E. WINGFIELD

The efforts of the past Council have been well rewarded, as you will see from the printed report submitted by the Secretary at the meeting. You will see from his report that there is more to your Alumni Association than holding Reunions. We are all agreed that the Alumni should be an active, alert organization, ready at all times to lend its weight of support to the School, its Staff and its undergraduates, as well as to represent the graduates in Alumni matters. Your attendance at the general meeting on Friday afternoon means something in this work—so turn out and say your say.

Apart from that, may I welcome you all to this Reunion. Your Committee has done all it can to make it a pleasant

(Continued on Page 4)

(Continued from Page 1)

there then occurred a sudden drop, the attendance has again steadily risen. Incoming first years are on the increase, this year's being 14% and last year's about 10% above the former.

Numbers, however, do not make a university, any more than do buildings and expensive equipment. It is in reality, the high standards of academic instruction, the prestige, zeal, and excellence of the staff and the industry and quality of the student body—the raw material used in the plant, as it were—that provide the measure of an institution of this nature. In all of these we are fortunate.

The loyalty and interest of the Graduates is a most valuable factor in the well-being of the University in general, and the Faculty in particular. It is a very fortunate thing for the University, and a matter for continued congratulation, that the interest of the graduate body is maintained to such a high degree as it is in behalf of this live Faculty. One is always full of admiration for the continued active interest which its graduates take. The main spring of this must be the "spirit of Old School" and the camaraderie which it engenders.

Several changes in curriculum of interest to graduates have recently occurred. The principal of these is the development of a Department called "Engineering Physics". It has arisen out of what is thought to be a growing demand for physicists trained in applied science and engineering, or perhaps it might be equally well defined by putting the objective the other way about. It is the usual course of four years leading to the degree of B.A.Sc., with entrance requirements and yearly passing standards somewhat higher.

Since the last triennial reunion the first graduates in the extended five years' course in the School of Architecture have passed out, the degree of B.Arch. now requiring this extra time. This change, made a few years ago, proved fully justified and has enabled the Architectural courses to be greatly broadened.

Several special lecture and laboratory

courses have also been added or extended in response to demands for which it is thought the new generation of engineers should be prepared. Some of these are:—Soil Mechanics; Municipal Administration; Aerial Photographic Surveying; Architectural Acoustics and Illuminating Design; Properties of Fluids; Aeronautics; Aerodynamics and Hydrodynamics, as well as additional courses in Advanced Mathematics and newly-arranged courses in Chemical Engineering.

Some further curriculum changes are now in contemplation. Some of these are in Chemical Engineering and in the Ceramics division of Metallurgical Engineering. It is hoped that as heretofore, the benefit of the advice of interested graduates will continue to be forthcoming to assist in correlating the courses in the Faculty with the probable trends in various engineering fields. In this connection it is observed with pleasure that a strong representation of graduates on the University Senate has been provided by the election recently held.

Graduates will learn with regret that since the last reunion two more of the senior professors, who built up the School and Faculty, have, by the requirement of seventy years age limit, been forced to retire. The loss in the active councils of the Faculty of Professor C. H. C. Wright in 1934 and Professor T. R. Rosebrugh in 1936, is being keenly felt; it is gratifying, however, to have them still available for advice.

At the reunion in 1933 in the midst of the depression, the question was being freely asked, "What is going to happen to all these young engineers and architect graduates?" It was a fair question then, but the answer has been provided as we have drawn out of the depression. As was said then, the engineering profession is better off than any other, as it is the last to shrink in activity in depression, and the first to revive with recovery. This view has been justified and it has been even a cause for surprise how graduates out of employment three or four years ago have re-entered, and how quickly and

satisfactorily the graduating classes of the past two years have been absorbed into the country's returning activities.

It will also be of interest to graduates that in the cycles of engineering education in this country, the proportions of students entering various departments are again changing. Chemical Engineering has been attracting large numbers and now they are crowding into Mining and moving toward Metallurgical. Civil Engineering and Architecture are still low. The following table will illustrate:—

Attendance by Departments (All Years)

	27-28	30-31	33-34	36-37
Civil	70	104	104	55
Mining	65	87	82	162
Mechanical	94	212	189	114
Architecture	39	48	46	32
Eng. Physics	—	—	—	26
Chemical	119	174	225	229
Electrical	136	200	201	114
Metallurgical	21	23	36	58
Total	544	848	883	790

C. H. MITCHELL,
20th October, 1936. Dean.

School Mourns the Loss of George W. Phene

All "Schoolmen", both graduates and undergraduates, mourn the very tragic death, on Monday, October 26, of George W. Phene, member of the graduating class in Chemical Engineering. Well known as a keen sportsman, he threw all his energies into many of the "School" athletics and will be sorely missed in hockey and rugby circles. George played the game courageously and for the pure love of it.

His loss will be felt by his classmates in and around the "School" buildings as he always had a ready smile for everyone.

His fellow "Schoolmen" extend their deepest sympathy to his family.

47th ANNUAL
THURSDAY "SCHOOL DINNER" **THURSDAY**
NOV. 19th **NOV. 19th**
WELCOME GRADS TO THE BEST DINNER YET !!!

CHAIRMAN'S MESSAGE

(Continued from Page 2)

one for you and in extending this welcome, I wish to express my appreciation of the work of all the Committee members and particularly that of Don Ross and Joe Banigan—without whom this Reunion would have been a sorry affair.

Finally—the thanks of the Association to the Engineering Society and its Toike Oike Committee for producing this special issue—just one more proof that the Old School spirit is very much alive.

H. E. WINGFIELD,

Chairman of 9th Reunion Committee.

GREETINGS FROM THE UNDERGRADS

Once every three years the real Old School Spirit is revived by our Grads when they meet for their triennial convention and pretend they are once more at school.

At this gathering we undergrads are given the opportunity to meet the men responsible for establishing School's fine traditions and who, both as undergrads and as alumni, did so much to make this faculty famous. The men whose example we, the undergrads, try to live up to in so many ways.

The achievements of those who have "gone before" inspire us to do our best to maintain the Engineering Society's reputation of being the biggest and best student organization on the campus.

The fine positions in life occupied by our "Grads" encourage us, who are still in the process of becoming engineers, to get the most out of our studies here and give us a brighter outlook for our future as graduates.

The diversified activities of Schoolmen after graduation prove to us the adaptability of an Engineering education. We see that the training we receive here fits us for many occupations other than Engineering. This gives us further encouragement.

The fourth year men more than appreciate the opportunity you afford them at your smoker to find out in a small way at least what doors will be open to them when they leave their academic life and thank you for the interest you take in your younger brothers.

Thus it is with a feeling of pride and admiration that the active members of the Engineering Society welcome you back to your old "haunts" and wish you every success for this convention.

H. N. POTTER,

President,

Engineering Society.

SQUAD SHUN! 3T4!

All members of 3T4 should avail themselves of the class headquarter room upstairs. You will discover the number posted on the board. Go right up and make yourself at home. There is a royal welcome awaiting you and something to wash it down with.

If you survive after the hilarity of the Smoker and the frivolity of the Dance you are requested to report to Hart House at 1 p.m. on Saturday for luncheon. You will find all your classmates gathered in the Chess Room. The luncheon will be furnished in sufficient time to enable you to amble over to the rugby game.

There will be a short business session during the luncheon and you should be present to voice your opinions. Your executive is endeavouring to plan several interesting gatherings during the coming year and we want to enlist your personal support.

First Old Maid: "Would a stocking hold all you want for Christmas?"

Second O. M.: "No, but a pair of socks would."

* * *

Mr. Newlywed Rossiter: "This steak tastes queer to me."

Mrs. Rossiter: "I can't understand it. I know I burned it a little, but I rubbed vaseline on it at once."

IN OUR WELL-CONSIDERED OPINION

HART HOUSE MASQUERADE

Engineers, young and old, don't miss the opportunity of attending the Hart House Masquerade; this is the outstanding dance of the year, noted for its gaiety, beauty and good music. It is the *only University* function on the campus, so let's give it our support and see that it remains.

Originality is the keynote of this masquerade, and although costumes must be worn, you need not go to any great expense. Two prizes will be awarded; one for the the most beautiful couple, and one for the couple in the most original dress.

Come to this colourful affair; dance to langrous music; see the sheiks from Arabia, the dusky Indian Maidens, the Geisha Girls from Japan, and last, but not least, the chorus girls of America!

The music will probably be supplied by Stan St. John's orchestra, and, as usual, an exhibition of water polo and diving will be shown in the Hart House pool. The date is November 13th.

HART HOUSE BARBER SHOP

THE
HANDIEST PLACE
FOR A
HAIRCUT

While waiting for the speaker at a public meeting, a pale little man in the audience seemed very nervous. He glanced over his shoulder from time to time, and squirmed and shifted about in his seat. At last, unable to stand it any longer, he arose and demanded, in a high, penetrating voice. "Is there a Christian Scientist in this room?"

A woman at the other side of the hall got up and said, "I am a Christian Scientist."

Well, then, madam," requested the little man, "would you mind changing seats with me? I'm sitting in a draft."

3T5

3T5 Alumni spent a very enjoyable evening together on Thursday, October 7th, when they assembled for Dinner at the Y.M.C.A. The walls of the "Y" shook with the songs of the Engineers. Later the boys adjourned for bowling, billiards, swimming and—ping-pong.

Several more of the 3T5 have joined the ranks of the "Stay-at-home's". Lorne Joase was married on October 17th. Pete Dawson will be hitched on October 31st. Good luck!

Don't forget that our year will have a room at the Royal York during the whole of the Reunion. Drop in during the Dance or Smoker and meet some of the lads.

All those wanting tickets for the rugby game on Saturday, October 31st, get in touch with Bob Hewitt or Murray Willer.

2T4

We are still meeting on the first Monday of the month at 6 p.m., at Muirhead's English Grill, Bay and Wellington Streets, and about 20 of the boys can generally be found there, eating and partaking of the genuine School fellowship. Our next meeting, December 7th, promises a surprise in entertainment. The chairman for this year has been Ted Emerson, and, automatically, the next year's chairman will be Jack Mitchell.

Notes:

George Beecroft and Art Colman were on the Vimy trip.

A. D. Barbour is now Dr. Barbour of the Ontario Research.

Ed. Carswell has been engaged on the rehabilitation of Fort Kingston.

Bryce Moffat is leaving for England to occupy an important position with Moffatts Ltd.

Brock Bailey's wife presented him with a son on October 20th.

The latest addition to our ranks is a daughter born to Mr. and Mrs. Joe Findlater, just in time for Joe to get to the Reunion.

COMMENTS

The opening shot of the Ninth Reunion—a Big Bang! Also presentation of a new gavel to our President. The crowd will be seated at tables; the hotel will serve and sell refreshments; at the conclusion of the entertainments, coffee and sandwiches will be provided by the Committee. The Electrical members on the Smoker Committee say that they are going to turn on the high-powered juice and the entertainment will be sparkling and there is not a gap in the programme. Civils say it's a well-built programme, plenty of strength, but the safety factors have been entirely overlooked! Mining people say surface indications are very rash. Architects say form, line and colour superb! The Editor's curious and is going to go early and stay late and will see you there!

Twenty-two Class Luncheons booked. Great enthusiasm has been shown in advance registrations for this big chance to renew the close friendships with your class mates. Class organizations are the strength of our Alumni Association. Turn out School men!

So much entertainment has been planned, some of you fellows are going to overlook the fact that our Association does important business and has a general meeting once every three years. You will slip an important cog in your Reunion, if you don't look after the serious side. Our hard-working Officers and President will only keep you an hour and a half.

This is a banquet tendered to our Chancellor, Sir William Mulock, the outstanding feature of which will be a Canada-wide broadcast, including an Engineering Alumnus from Vancouver.

As the School Dance starts after the banquet, there will be time to attend both functions.

Stan St. John's Orchestra.

Supper at midnight.

Full of School pep and go!

Your wife or sweetheart won't let you miss it!

The Faculty of the School will be glad to meet you and your families and give you a chance to look over the old stand.

There is a wild rumour of a Skit imported from Spain at half-time! Tickets for this game cannot be reserved at the Registration desk after 5.00 p.m. Friday.

SCHOOL STAG DINNER
Concert Hall.
Saturday, October 31st,
7.00 p.m.

Join the gang at the School Stag Dinner! Your Committee has been successful in securing an outstanding personality and business executive, Mr. Floyd Carlisle, Chairman, Consolidated Edison Companies of New York, as the principal speaker. Turn out, School—A Big Time!

LADIES' DINNER BRIDGE
Eaton's Round Room
College Street
Saturday, October 31st,
7.00 p.m.

Don't worry about the wife or sweetheart; the ladies will be entertained at dinner and bridge, at Eaton's Round Room, College Street.

ALUMNI CHURCH SERVICE
Convocation Hall
Sunday, November 1st,
3.00 p.m.

A special Alumni University Service will be held in Convocation Hall. Rev. Dr. Kerr, of Pittsburgh, a notable preacher, will give the address. Admission by tickets will only be good until 2.45 p.m.

TEA AND MUSICALE
Great Hall, Hart House
Sunday, November 1st,
4.30 p.m.

After the Service, there is a Tea and Musicale at Hart House, arranged for you and your guests by the Alumni Federation of the University of Toronto.

DON ROSS, VICE-CHAIRMAN

The entire Reunion is in the very capable hands of "Pat" Wingfield, the Reunion chairman, who recently moved to Stratford as an official of the Imperial Rattan Co. Ltd. Unfortunately, Pat is only able to be in the city very occasionally and therefore Don Ross, also a very active member of that famous year, 2T3, was appointed Vice-chairman to co-ordinate the work of the various committees and to act in Pat's absence.

UNDERGRADUATES

The Alumni Association extends a pressing invitation to any undergraduate "Schoolman" to attend any part of this, the ninth triennial reunion. The programme of events will be found elsewhere in this edition.

The Association has also very kindly invited the graduating year to turn out to the Smoker on Thursday night, Oct. 29. A wild, wet, wooly time is promised for all. Come on, Fourth Year—show the grads some real school spirit(s).

SCHOOL DANCE

The School Dance promises to be the outstanding one of its kind with:

- (1) Stanley St. John's orchestra with Stanley in person.
- (2) Campbell Sisters singing with the orchestra putting on special numbers.
- (3) Honouring groups of years by dance selections popular at those times.
- (4) Novelties.
- (5) Several Paul Jones' to make a formal dance informal.
- (6) Supper a la Royal York style at midnight.

To be held at 9.30 p.m. in the Concert Hall, Friday evening.

He was telling her about the members of the football team. "Now, there's Johnson," said he, "in a few weeks he will be our best man."

And then she lisped: "Oh, Jack, this is so sudden!"

Courtesy of Underwood & Underwood.

PRINCIPAL SPEAKER AT REUNION DINNER

One of the outstanding personalities in the Public Utilities Industries of United States, Mr. Carlisle started his career as a lawyer in Watertown, N.Y., but his activities soon embraced a variety of financial and business enterprises, which led him finally to New York City, where he founded his own investment banking firm. He was prominent in the formation of the Niagara Hudson Power Corporation, of which he is the Chairman of the Board. He and his associates purchased control of the St. Regis Paper Co. which controls the Canadian Company of the same name. In 1930 he became interested in the public utility affairs of New York City, serving as a Director on various of the old Consolidated Gas and Edison Electric groups. When these various companies were this year consolidated under the name of Consolidated Edison Company of New York, Mr. Carlisle became Chairman of the Board of one of the world's largest public utility enterprises. He has the reputation of a brilliant speaker and was one of the principal speakers at the recent World Power Conference at Washington.

Mr. Carlisle, as the principal speaker at the dinner, will respond to the toast to "The Profession", which will be proposed by Norm. Gibson, '04, an old friend and associate of Mr. Carlisle's. Mr. Carlisle will be introduced by Dr. T. H. Hogg, '07, Chief Hydraulic Engineer of the Ontario Hydro-Electric Power Commission.

Willie Arison declares that the drought was real bad down in Kansas City, in fact he claims he saw three trees chasing a dog up a hill.

Judge Cockburn: "What were you doing when the police raided the place?"

Locksmith Dolly Black: "Making a bolt for the door."

With the compliments of

ART METROPOLE

Branch of Hughes-Owens Co.

ENGINEERING, DRAUGHTING and ARTIST MATERIALS

REUNION DINNER

Over a span of over fifty years the old "School" has built up a reputation in many widely varied fields. Its Dinners have long been noted for the abundant display of "School spirit" engendered on such occasions and we venture to predict that few people in the Royal York Hotel on Saturday evening will not know that Schoolmen are again dining.

The place will be the Concert Hall (on the Convention floor), the time around 7.30 p.m., and the price \$2.00. Needless to say, everybody is ensured a bang-up good time and in what better way could one want to wind-up our triennial Reunion celebrations?

Again as always, a real good speaker has been secured to deliver the principal address (by the way, the speaking programme will not be burdensome and the entertainment programme will not be disappointing, we hope). Mr. Floyd L. Carlisle, Chairman of the Board of the Consolidated Edison Company of New York, will be that speaker. Mr. Carlisle is internationally known in the electrical public utility field and in his remarks we feel sure will be found ample food for considerable thought.

So remember, all Schoolmen from the youngest undergrad to the oldest grad are invited; dig out the tux. if you want, but if not, anything from overalls up will be accepted and let's make the 1936 Dinner something to be remembered until 1939 rolls around. Who knows but what the 1939 Dinner may be held in somebody's trenches!

THE SMOKER

(Continued from Page 6)

3T7 will show "The Sheiks". You'll laugh at their tragedy, and cry at their comedy.

* * *

Do you remember the corn specialist on the market square? He'll try to be there, so get a load of "The Fakir".

* * *

Have you ever seen fans dancing around in the ball room? Would you like to see them?

* * *

All of which goes to show there'll be a big time, but we can't tell the whole story, so come, and come prepared for a wow of an evening with stories, shows, and songs, and beer, buns, and biscuits.

'Nuff sed.

* * *

He: "Let's get married or sump-thing."

She: "We'll get married or nothing!"

HART HOUSE THEATRE

Week of OCTOBER 26

75c, 50c (tax extra)

At the Box Office

FOR YOUR DATE BOOK

HART HOUSE, November 19, SCHOOL DINNER: Turkey, eloquent, but brief, toasts, professional entertainment, Guest of Honour, H. Napier Moore, Editor, Maclean's Magazine, an outstanding after-dinner speaker, full of wit and common sense. The evening will have all the spirit and dignity customary to this traditional function. Grads may procure tickets at the Engineering Society Office.

HART HOUSE, January 22, SCHOOL NITE: A new and entirely original Revue in Hart House Theatre, worth the price of the evening itself, entertainment in the swimming pool, and dancing in six separate rooms to music by outstanding dance bands.

ROYAL YORK, February 26, SCHOOL AT-HOME: The NIGHT that every Grad remembers and every Undergrad will remember; Banquet Hall and Crystall Ball-Room, supper, a renowned dance orchestra, beauty and colour, the gayest and most resplendent of University social functions. Make your arrangements to be there well before the date.

'Howdy! twenty-fivers!', another reunion marks the passage of three more years since we became Alumni of the Old School. Seems we must be growing up now; we rate two Committee Chairmen this Reunion and we're almost bound to rate one Vice-President of the Association come Friday night. Maybe we ought to make a special effort to put this Reunion over as it deserves.

See you then at the Smoker, at the Class Luncheon (Dining Room, Main Mezzanine of the Hotel, 12.30 noon, Friday) and at the Class Rendezvous Room any time up to breakfast Sunday.

Special table at the Dinner, Saturday night.

1901-11

1910 (the class of) and 1911 are holding a joint luncheon on Friday, October 30th, at 12:30 noon at the Royal York—location Ball Room on Convention Mezanine floor.

1910 and 1911 are also associating in their dug-outs—Rooms 140 and 136. These rooms have been reserved as rendezvous rooms for *Friday and Saturday*, the 30th and 31st.

By the way, you ought to offer "Shorty" Whatmough congratulations—one of our latest benedicts, you know. "Sparky" Carruthers was accepting congratulations recently—family now—one (wife)—two (offspring); but you can congratulate most anybody you meet for that matter, we seem to have multiplied in eleven years.

Out-of-town members are particularly asked to see our Acting Secretary, Art Frampton, if you have any interesting items of news that should be broadcast through the *Monthly*. The next few issues should have something more than the doings of the Toronto group, who perhaps have been over-publicized in the past.

Don't forget the luncheon.

Monday Evenings

SUPPLY DEPARTMENT

Welcome home, Grads . . . welcome to the Great Home-Coming. Once again it is your privilege to visit old haunts, roam down the old halls, greet familiar faces, renew past acquaintances and in general enjoy that GREAT SCHOOL SPIRIT.

On behalf of the staff, in charge of the Supply Department of the Engineering Society, I wish to extend an invitation to all Schoolmen to drop in and browse around . . . we have the "Old Mug" all polished up for the occasion.

Our department carries a complete line of drawing instruments, slide rules, etc., and would take great pleasure in serving you, if you are requiring any such necessities. (GEORGE F. BEARD,

NOTES ON RECENT OPERATIONS

W. A. STEVENS

First day of rugby practice was September 14th. The squad didn't look the same with Capt. Bob Coulter, Joe Connelly, Hugh Marks and Jack Oakley among the missing.

* * *

Nevertheless there was a spirit of optimism present that could not be denied. Capt. Gus Greco, Ken Harris, Turney Williams, Frank Sirdevan, Al Williams, Butch Alison, Jack Holden looked even then as if they would develop into one of Varsity's greatest wing lines.

* * *

With Cam Gray and Bob Isbister as the nucleus the back division was strong in the kicking department. Therefore the Doctor's orders were: "Get a good quarter, several shifty halves and you will have a pretty good football team."

* * *

Well, the prescription was filled by Ralph Ripley, quarter, and half backs Sid Jackson, Red Nally, Ive Edwards and Barry Gray.

* * *

After two shaky starts, one against Balmy Beach in the City Series and then Western in the Intercollegiate opener, the lads settled down to busi-

Drop in and Renew Old Friendships

ness and stunned Queen's 14-2 in a game that thrilled every Blue-and-White supporter to the core.

* * *

As we prepare for McGill, our fifth game of the current season (I hope we did well in number four last week), it looks like a bitter struggle down the stretch. A dangerous McGill team this Saturday, then Queen's in Kingston next week (which will be anything but a tea party), and then the finale with Western in Toronto. Enough said.

The Mustangs are really a spectacular team and may defeat Queen's in London this week-end to jumble everything, so it looks like a long Fall.

* * *

By the way, did you know Bob Webber was the only Schoolman on last year's Senior Rugby Team? This year we have Ron Alison and Norm Beattie. Looks like rugby is getting too rough for the young Toike Oikers.
